Contents to volume 62

Computational physics	*Issue*	*Page*
Schwenke, D.W. Compact representation of vibrational wave functions for diatomic molecules	1	1
Arjunwadkar, M. and D.G. Kanhere A simulated annealing based algorithm for eigenvalue problems	1	8
Sagar, R.P., V.H. Smith Jr. and A.M. Simas A Gaussian quadrature for the optimal evaluation of integrals involving Lorentzians over a semi-infinite interval	1	16
Baker, D.J., D. Moncrieff, V.R. Saunders and S. Wilson Diagrammatic many-body perturbation expansion for atoms and molecules. VII. Experiments in vector and parallel processing for fourth-order energy terms involving triply excited intermediate states	1	25
Pryce, J.D. and M. Marletta A new multi-purpose software package for Schrödinger and Sturm–Liouville computations	1	42
Friedman, R.S. and M.J. Jamieson A note on solving coupled second-order linear differential equations	1	53
Craven, C.J. and G.S. Pawley Molecular dynamics of rigid polyatomic molecules on transputer arrays	2&3	169
Alvarez, L.J., A. Alavi and J.I. Siepmann A vectorisable algorithm for calculating three-body interactions	2&3	179
Davis, M.E., J.D. Madura, B.A. Luty and J.A. McCammon Electrostatics and diffusion of molecules in solution: simulations with the University of Houston Brownian dynamics program	2&3	187
Rapaport, D.C. Multi-million particle molecular dynamics. I. Design considerations for vector processing	2&3	198
Rapaport, D.C. Multi-million particle molecular dynamics. II. Design considerations for distributed processing	2&3	217
Smith, W. Molecular dynamics on hypercube parallel computers	2&3	229
Evans, M.W. and D.M. Heyes Simulation and symmetry of shear and elongational flow	2&3	249
Morriss, G.P. and D.J. Evans A constraint algorithm for the computer simulation of complex molecular liquids	2&3	267

Computational physics (continued)	*Issue*	*Page*
Refson, K. and G.S. Pawley Correlations in the plastic crystal phase of *n*-butane	2&3	279
Torda, A.E. and W.F. van Gunsteren The refinement of NMR structures by molecular dynamics simulation	2&3	289
Chynoweth, S., U.C. Klomp and L.E. Scales Simulation of organic liquids using pseudo-pairwise interatomic forces on a toroidal transputer array	2&3	297
Teleman, O., B. Svensson and B. Jönsson Efficiency in statistical mechanical simulations of biomolecules – computer programs for molecular and continuum modelling	2&3	307
Deitrick, G.L., L.E. Scriven and H.T. Davis A new method of error analysis for molecular simulations	2&3	327
Hammonds, K.D. and J.-P. Ryckaert On the convergence of the SHAKE algorithm	2&3	336
Mountain, R.D. and D. Thirumalai Ergodic measures for the simulation of dielectric properties of water	2&3	352
Brown, D. and J.H.R. Clarke A loose-coupling, constant-pressure, molecular dynamics algorithm for use in the modelling of polymer materials	2&3	360
Computer programs in physics		
Salin, A. Multistate molecular treatment of atomic collisions in the impact parameter approximation. IV	1	58
Salvat, F. and R. Mayol Accurate numerical solution of the Schrödinger and Dirac wave equations for central fields	1	65
Srikameswaran, K. and R. Wallace 3D isovalue surface plots	1	80
Sciutto, S.J. HUBCOM: a program for Monte Carlo simulations on generalized Hubbard models	1	90
Wiest, R., J. Demuynck, M. Benard, M.-M. Rohmer and R. Ernenwein A program system for ab initio MO calculations on vector and parallel processing machines. III. Integral reordering and four-index transformation	1	107
Rycerz, Z.A. and P.W.M. Jacobs Vectorized program of order *N* for molecular dynamics simulation of condensed matter. I. MDPYRV1: vector pyramid, short-range interactions	1	125
Rycerz, Z.A. and P.W.M. Jacobs Vectorized program of order *N* for molecular dynamics simulation of condensed matter. II. MDSLAB1: slab, short-range interactions	1	145

Computer programs in physics (continued)	*Issue*	*Page*
Alvarez Collado, J.R., J. Fernández Rico, R. López, M. Paniagua and G. Ramírez Erratum notice. Rotation of real spherical harmonics (ABHI – CPC 52 (1989) 323)	1	162
Krüger, P., M. Lüke and A. Szameit SIMLYS – a software package for trajectory analysis of molecular dynamics simulations	2&3	371
Fincham, D. Book review	1	166
Raine, A.C.R. Book review	2&3	381
